## Handbook Highlights

In an effort to promote increased personal responsibility, encourage college preparatory study habits, and diverse academic preparation, GFCCHS permits seniors to utilize laptops for school coursework, MTDA classes, or dual credit courses only, provided they follow all school rules of acceptable use and they have a signed acceptable use form on file. The school will not be responsible for loss, damage, or theft of personal laptops

used on school property. All devices will be subject to the search policy used for cell phones.

Juniors, who have an academic need for a personal PC that can't be met with a school laptop, can request a waiver from the Counseling office. Chromebooks or laptops can be checked out in the office each period.
